File No. 01/1001/Misc-Mines/2016 | 383

Date: 02/05/2016

Sub: Further regulations for de-congestion of roads.

Various initiatives are taken by Department for streamlining transport of ore on road, so that least inconvenience is caused to the other commuters.

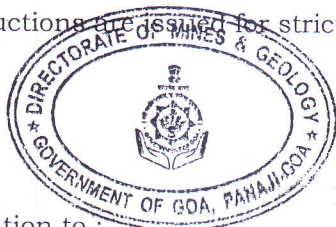

Despite taking various measures there are some bottlenecks because of which general public is made to suffer.

As a further confidence building measure and a step towards regulation of transport activity, it has been decided that for the remaining days of the season a batch of five trucks each per single route shall be given transit passes, who shall move in a convoy from loading point till unloading point and from unloading point till further destination.

There shall be a gap of five minutes after the last transit pass of the fifth vehicle is generated or the last transit pass is cancelled at a unloading point as the case may be to ensure that free movement of other vehicles and commuters is not disturbed for at least five minutes at a time.

The generation of the trip sheet shall also be discontinued from 12.45p.m to 2.00 p.m or in such intervals as the case may be depending upon the distance between the loading and unloading point, so as to avoid the parking of vehicles on road between 1.00 to 2.00 p.m.

This instructions are issued for strict compliance on trial basis.
